DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 1-5 and 31-40 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. A sheet is flat. Having an edge as defined in the specification would mean it would have to be a three-dimensional article, not a sheet. It is clear from Applicant's Figure 1 "edges" are NOT equivalent to "sides". Defining the phrase "an edge portion" by including the limitation "adjacently positioned and substantially perpendicular to the facial portion," is indeed a side of a sheet. The Examiner strongly suggests calling the "edge portion" a "side". It is impossible to print on an edge of a sheet of print media the way Applicant defines it (especially a barcode as instant claim 33).

Claim Objections

3. Claim 37 is objected to because of the following informalities: Omit the comma after "portions". Appropriate correction is required.
4. Claim 38 is objected to because of the following informalities: "medua" is misspelled. Appropriate correction is required.

Response to Arguments

6. Applicant's arguments filed 6-26-03 have been fully considered but they are not persuasive.
7. Applicant appears to give a new definition to a well-known defined term. The term "edge" is

Art Unit: 1774

known to refer to the periphery of a sheet. While applicant may be his or her own lexicographer, a term in a claim may not be given a meaning repugnant to the usual meaning of that term. See *In re Hill*, 161 F.2d 367, 73 USPQ 482 (CCPA 1947). The term "edge" in the claims is used by the claims to mean "not on the facial portion" while the accepted meaning is "on the outer peripheries of a facial portion of an article (e.g. sheet)".
